

Notes on connection and control of Ultrak dome KD6/KD6-Z  
'MaxPro' protocol

**C\_Ultra1.bin**

Settings (fixed):  
9600 baud, even parity, 1 stop bit, 8 data bits

**Important:**

The KD6 dome must be set to "MaxPro" mode prior to startup:  
DIP switch 4 (please refer to the respective manual for the DIP setting).

Please ensure proper setting of the RS-485 address at the dome (settings of DIP switches 1 - 3)!

Connection of Ultrak dome KD6 and DNI-422
