

Notes on connection and control of keyboard Maxpro KS200  
for (Ultrak) telemetry receiver

**Kb\_KS2\_1.bin**

Settings (fixed):

19200 baud, none parity, 1 stop bit, 8 data bits

Control notes:

The iris functions are NOT supported by the telemetry protocol!

Swivel/tilting speed also is NOT variable!

Note on connection:

The keyboard is connected via a so-called RJ-45 terminal block.

In addition to the voltage supply, RS-485 transmission lines + (pin 1) and - (pin 8) are lead through here.

Connection of KS200 keyboard and DNI-422:
